Hariharbhawan-3, Lalitpur Nepal June 2024 – Feb 2025 9 months

Projects

Collect

May 2025 – present

Web application that lets users build custom questionnaires, share pre-made templates with a public community.

- Created an intuitive drag-and-drop-style form engine that allows users to generate customizable survey links and share templates across a public library.
- Developed a fast Vite/React frontend styled with Tailwind CSS, supported by a Node.js/Express REST API and Prisma ORM with MongoDB.

Sotus

Oct 2025 – present

Fun application to read manga using ManagDex API.

- Integrated MangaDex REST APIs using TypeScript to fetch real-time chapter releases.
- Built a lightweight, high-performance reader UI using Svelte

Kanriki Kun

Jan 2024 – present

Developed a multi-tenant ERP system with isolated tenant data, enabling multiple organisations to operate securely within a single application.

- Built and maintained core business modules including Human Resources (HR), Accounting, and Inventory/Handling Management.
- Collaborated with the team using Git and participated in code reviews, bug fixes, and feature development following agile practices.
